

A world first...

The TerraCyclic™ Bio Bin is made using biodegradable plastic additives and is designed not to be reused.

TerraCyclic™
BIODEGRADABLE
Safe to return to mother earth

What's in a name?

Women all over the world for 1000's of years have been physically connected to the cycles of the moon, and spiritually connected to the earth.

TerraCyclic™ honours these ancient connections and traditions.

REVOLUTIONARY
Cartridge ↔ System

The Truly Disposable - Sanitary Disposal Unit

The Ultimate Sanitary Solution offers:

Unique disposable system

Long-life Cylinders

- Convenience
- Simple self service
- Easy Disposal
- A choice of exterior finishings
- Longer unit life
- Minimal handling and cleaning
- Environmental sensitivity
- A discreet addition to rest rooms
- And requires minimal storage.

Making it Perfect for...

- Smaller businesses
- Locations without full servicing plants
- Isolated businesses unreachable for servicing
- Rest rooms with seasonal requirements
- Sea based operations
(cruise ships, ferries, naval vessels)
- Environmentally sensitive areas
(beaches, nature parks,ski fields)
- Secure or restricted facilities
(prisons, ports and mills)

TerraCyclic™ is designed not to be reused.
Made using biodegradable plastic additives it is completely safe to return to the earth through normal refuse disposal.

Cartridges are easy to store, replace and dispose of. There is no cleaning involved. The cartridge is simply inserted into the cylinder and then disposed in its entirety after use, with other waste.

Cartridges already contain pre-inserted biodegradable liquid gel.

Cartridges are supplied to individual order, or in boxes of up to 100 units. They are packed neatly into each other for easy storage.

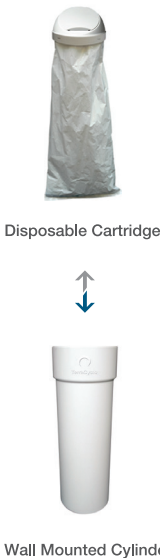

Units come in two sizes:

Regular:

13 litre Cylinder (Height: 70cm, Diameter: 15cm) with up to 100, 13 litre replacement cartridges per box.

Large:

26 litre Cylinder (Height: 80cm, Diameter: 20cm) with up to 50, 26 litre replacement cartridges per box.

Each TerraCyclic™ sanitary disposal unit consists of a long-life wall mounted cylindrical unit, which holds the replaceable lid and liner (cartridge).

TerraCyclic's™ unique design and compact size guarantees cylinder life is extended. Once it is mounted on the wall, the slim line unit never needs to be handled again, This makes cubicle cleaning easier and is a discreet addition to any rest room.

The units are manufactured in white. Other finishes are available on request.
